Otsimo – Autism Education

iOS rating: 4.5

Android rating: 4.1

Categories: Educational, Entertainment, Games, Behavioral Intervention, Autism Awareness

Description: Otsimo is an ad-free and child-friendly app that helps to teach children with autism the fundamentals of education. It can create endless fun through matching objects, identifying letters, and learning different shapes. This awesome app can also provide [speech therapy](#) and increases mental development.

Guided access

Guide access that lets you lock the iPhone or iPad to a single app. For as long as guided access is enabled, only that one specific app can be used, and there's no way to exit it for the Home screen or any other app. That can make Guided Access extremely useful for people on the autistic spectrum who need assistance focusing or with fine motor challenges.

Choiceworks

For those on the autistic spectrum, daily routines can be anything but routine. Choiceworks helps by providing management tools that encourage emotional control and patience.

- \$3.99 - [Download now](#)

3) The recently launched **YouTube Kids App** provides content deemed appropriate for children. With device monitoring that includes control of timers, volume, and a limit to what your kids can search on their own, this app aims to bring a safe viewing experience for all. (Free, available for iTunes and Android)

4) **Choiceworks** is another app that aids in completion of daily routines through visuals, and focuses on improving waiting skills. Features schedule, waiting, and feelings boards. (\$6.99, available for both the iPhone and iPad)

10) **Kid in Story** is an exciting visual story maker that allows your child to be placed directly into the story! With 12 different templates, this app can be useful for engaging struggling readers and reinforcing routines. (\$6.99, available for iPhone and iPad)

Magic Fluids Free

iOS rating: 4.8

Android rating: 4.4

Categories: Entertainment

Magic Fluids app creates an interactive dynamic live wallpaper. For example, the user can touch the screen and enjoy beautiful motions of colorful smoke and water. With that simulation, it will help an individual with autism to calm down and relax while watching magical swirls of flowing colors.

First Then Visual Schedule

iOS rating: 3.5

Categories: Behavioral Intervention, Health Manager

First Then Visual Schedule is an app for individuals with **communication needs**. This app allows the user to add images, record voice and organize a schedule. Additionally, can also backup your created schedule via iCloud. This app can help your child increase his/her independence and reduce anxiety through the use of visual schedules.

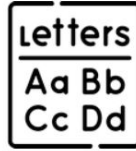

AutiSpark is a complete learning program for kids with autism

An app created with the help of experts

Well-researched games, stories and activities

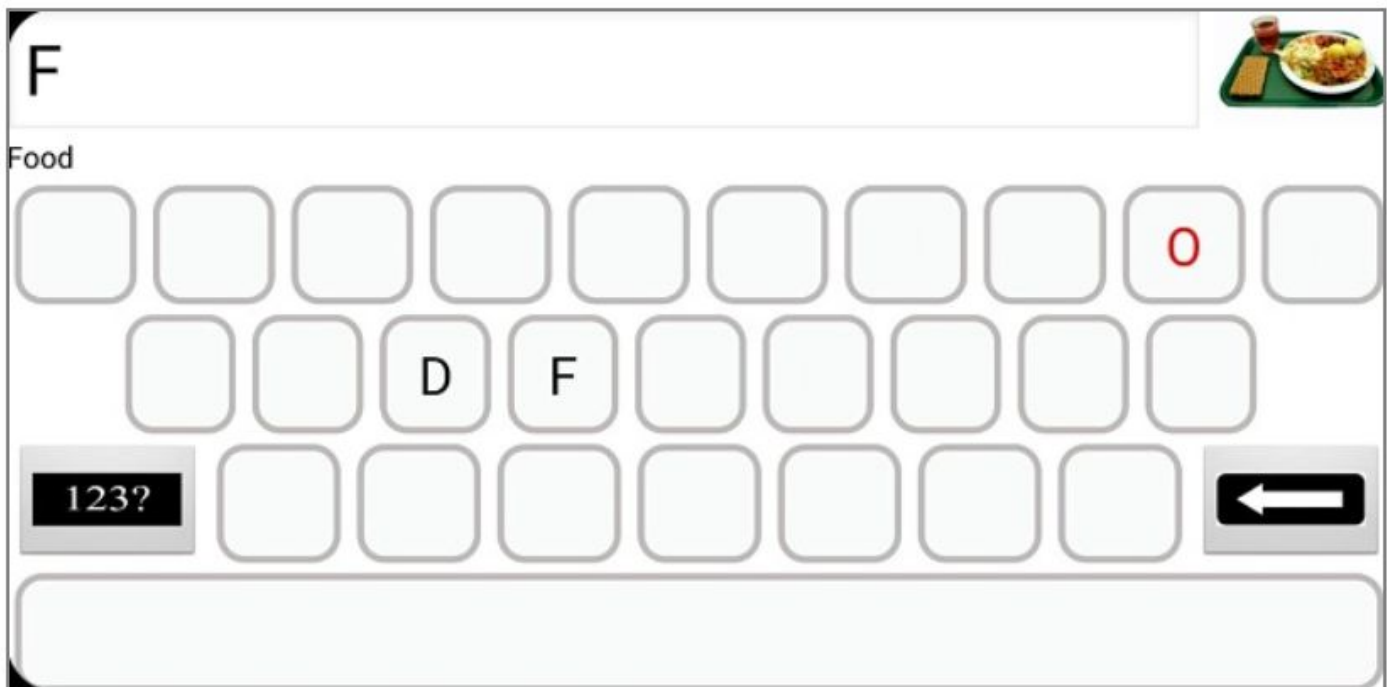

Library of educational worksheets and workbooks

Designed to engage kids with autism

I'm On It Focus Timer for ADHD & ASD — Minimizes Distractions to Keep Children Focused

8. Autism Read & Write Pro — Uses Everyday Objects to Introduce Kids to the Basics of Literacy

Autism Read & Write Pro is an app created to help autistic kids grasp the basics of reading and **writing**. Available lessons vary in complexity, so you'll find the app useful even if your kids are more advanced. Each lesson provides writing and reading exercises that include items children come across every day at home, school, and other places. This helps them link their new skills to their offline routines which facilitates continuous learning and discovery even when they don't use the app. I particularly liked that I could also adjust the settings manually to fully match my desired learning speed and make the most of the lessons.

12. Magic Fluids

Helps children unwind and relax with a liquid-like simulator.

13. Dino Tim Full Version: Basic Math for Kids

Teaches kids on the spectrum various math concepts through an engaging and magical storyline.

14. Sensory Light Box

Applies a cause-and-effect learning with 30 different colorful displays.

15. Aiko & Egor Animation 4 Autism

Models positive social behavior through cartoon episodes and short games.

16. Dr. Panda Game Series
